IT ORCHESTRATOR WITH A SOLID BACKGROUND IN OPERATIONS MANAGEMENT

I am a dedicated worker, a loyal colleague and I always go above and beyond to make sure deadlines and project plans are met. Team and operational management are my forte and I excel under pressure. I have managed software development projects, virtualization projects, relocation of offices, ERP/CRM/SAP integrations, Business Intelligence collection and integrations with 3rd party providers. I have a very diverse skillset and I am an exceptionally quick study.

As a leader I focus on positive flat-level communication between team members and departments and optimizing processes and workflows through solid analysis and testing, while meeting deadlines and ensuring expenses are kept within budgets.

PROJECTS OF NOTE

Virtualization | Hyper-V, VMWare, Azure

Complete migration from Physical to VMWare ESX/vSphere, with automated fail-over for business critical applications. Subsequent migration from VMWare to Hyper-V and Azure Cloud. Done without impact to business processes and daily production. Done without external consultants.

Editorial Solution | REP, PublicationMaster, MPS

Redesign and co-development of a full editorial to print solution, with integrations to sales, printers and web CMS platform. Strong emphasis on ad management and business intelligence platforms.

Office365 | Exchange, Lync, Sharepoint

Complete migration to Office365 and Skype for Business from local Exchange, Lync and Sharepoint. Done without external consultants.

PROFESSIONAL EXPERIENCE

Metroxpress A/S | IT Manager

Mar 2008 – Present

While working for Metroxpress I have completely redesigned and restructured the IT infrastructure, with a focus on business continuity and cost/performance optimization.

I have co-developed and designed a complete workflow solution for pre-press, editorial, ad management and page delivery.

I have cut IT costs yearly, while still growing the services and support provided by IT.

I have completely virtualized the local IT environment, with fail-over to an off-site cloud solution for all services.

Projects:

- Device and Asset LifeCycle management
- Remote Management Solution
- Automated workflow design and development
- Virtualization and Cloud migration projects
- Storage and 10Gbit network optimization
- SAP/ERP/CRM/BI integrations and development
- Editorial and Production software design and implementation
- Complete infrastructure re-design
- Server and Service monitoring solutions
- Business Continuity and Disaster Recovery solutions
- Office relocations
- Security & Surveillance
- Lean investment and financial management of IT

NSS Financials | IT Support

Nov 2007 – Mar 2008

While working for NSS Financials I implemented a solution for remote deployment of software and Operating Systems for all Elgiganten stores in Denmark.

I also setup a building to building directional Wireless solution and streamlined the Remote Support solution.

Projects:

- New store planning and deployment
- Long-Range wireless installations (Directional, inter-building setup)
- Distributed software deployment
- Server Monitoring

Contex A/S | Quality Assurance & Testing

Apr 2005 – Nov 2007

While working for Contex I took over the IT department after working as a QA & Test assistant.

I designed test-procedures and instructed technicians in Spain and Holland on the service and maintenance of large format printers and scanners.

I traveled to Spain, England and Singapore to instruct and test installations.

Projects:

- IT Management and development
 - Server Clustering
 - Build-Server management
 - Virtualization Consolidation
 - Off-site Backup and Replication
 - Factory process and workflow optimization
 - International Technical Instructor for Wide-format solutions
 - Hardware and Software Testing
 - Quality Assurance
-

SKILLSET

Operating Systems: Years of managing several Linux distributions (Debian and CentOS in particular), Windows Server (including 2012 R2 & 2016) and OS X Server installations. Deployment and management of Windows, OS X and Linux in enterprise environments.

Cloud Solutions: Azure, Office365, Skype for Business, Tableau, BigQuery, Analytics, AdForm, Google DoubleClick, AdTech, FreshService

Server Software: SCCM, Hyper-V VMM, Hyper-V, vSphere, vCenter Server, Veeam, Zabbix, Nagios, Adobe Indesign Server, QuarXPress Server, Enfocus PitStop, Callas pdfToolbox, GhostScript, Publication Master, LineUp Adpoint, OwnCloud, Apache, Nginx, Postfix, Dovecot

Client Software: Superuser level experience in MS Office, Adobe CC (Photoshop, Premier, Acrobat, Distiller, Indesign), Gimp, QuarkXPress

Management: Active Directory, Meraki MDM, SCCM Device Management, LANdesk

Programming: Familiar with PHP, Perl, Python, JavaScript, Shell scripting, SQL & Database design in general

Specific tools: Ritzau MediaNet

Project Management: Familiar with Lean, Agile & Scrum methodologies
